Introduction

Purpose :

The purpose of this document is to present a detailed description of the eSagu document repository. It will explain the purpose and features of the website, the contents of the website and the type of data stored in the website.

Scope :

This website had been developed to let users(viewer) access and view data and authenticated users(uploader) can manage the data (access, delete and upload) related to farming and eSagu.

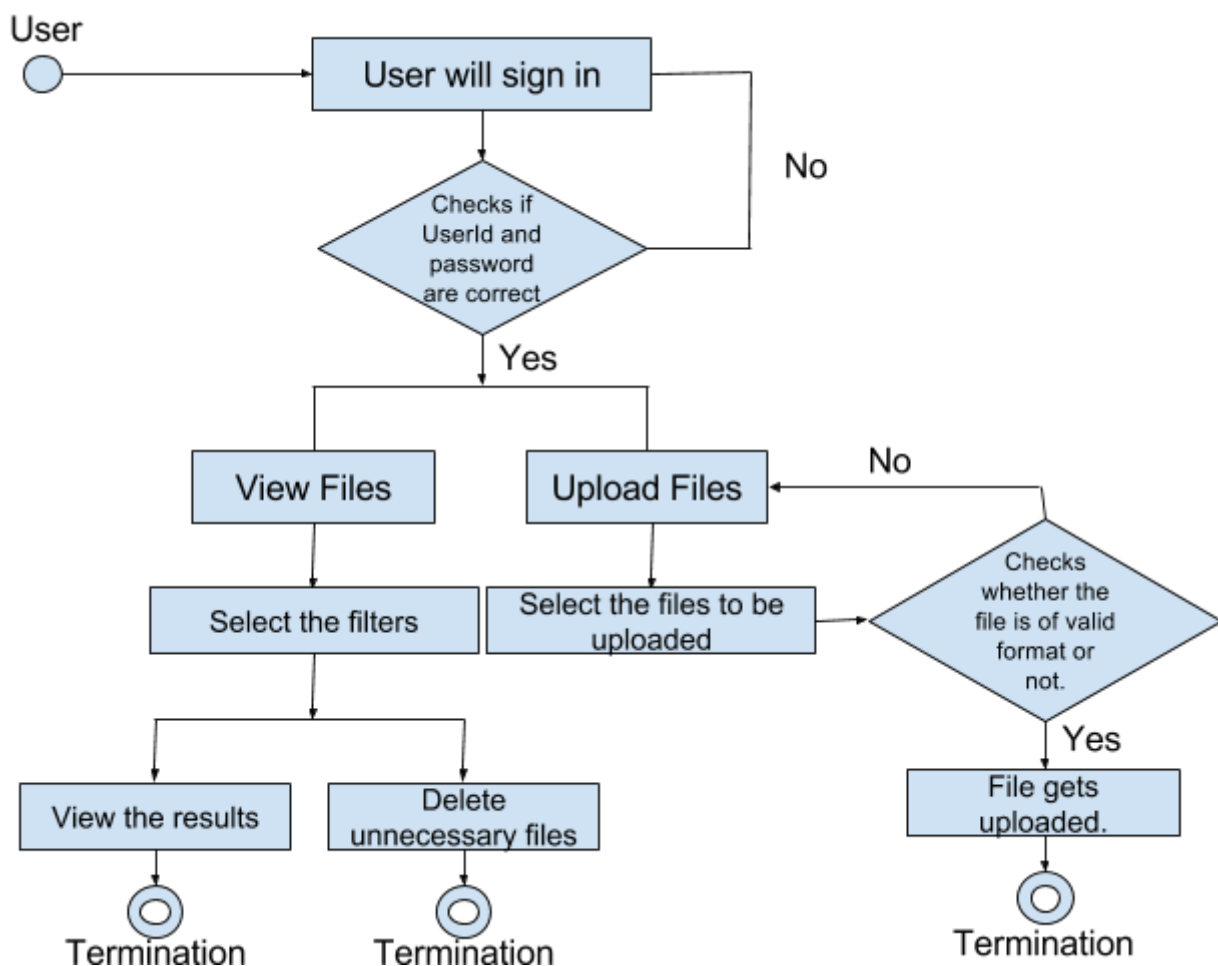

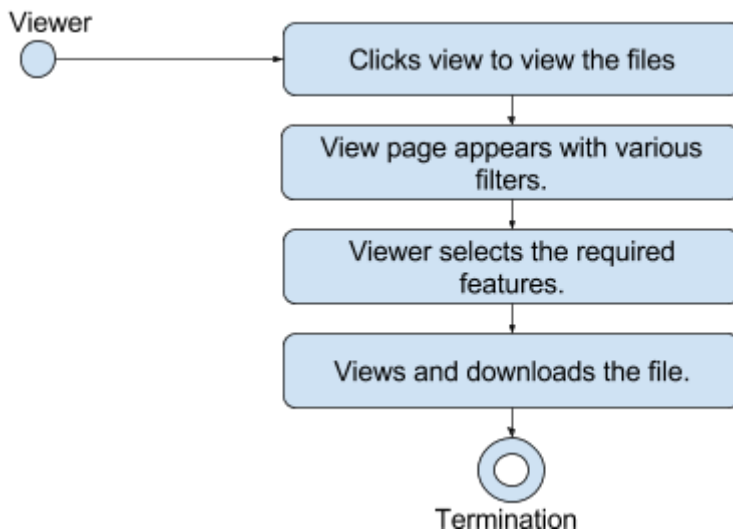

Glossary :

TERM	DEFINITION
Viewer	Anyone who can view the data on the website
Uploader	An authenticated user who can access, upload and delete data from the website
Database	Collection of all the data that is available on the website
HTML(Hyper Text Markup Language)	It is used to create static webpages.
PHP(Hypertext Preprocessor)	It is used in the backend to connect to the database and insert or retrieve data from the database.
Apache 2.0 web server	It aids in hosting the website.

Overall Description

Functional Requirement Specification :

Activity Diagram :

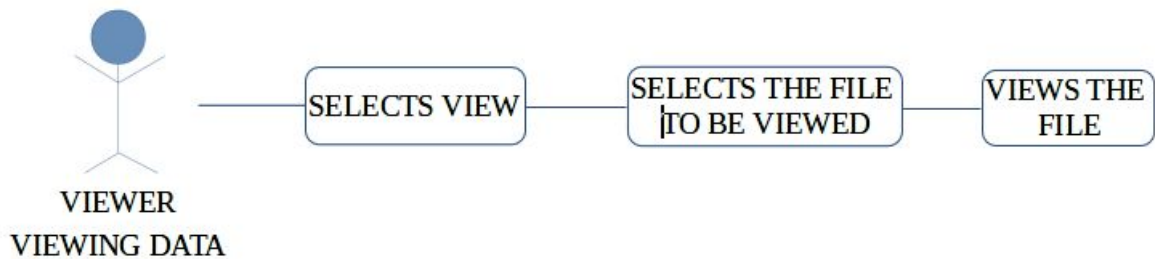

Use cases :

They are two kinds of users who interact with the system, the viewer and the uploader.

-Viewer : A viewer is anyone who visits the website to view the uploaded data.

- Uploader : An authenticated user who manages the data on the website. He can access, upload and delete data from the website.

Constraints :

Only data of a specific type can be uploaded.

DATA	TYPE
Images	jpeg, jpg, png
Videos	mp4
PDF	pdf
Doc files	odt, docx
Text files	txt
PPTs	ppt, odp

Database Design

Login :

Field	Type	Null	Key	Default	Extra	Description
UserId	varchar(50)	No	PRI	NULL		The Id of the user logged in.
Password	varchar(50)	No		NULL		Password of the user encrypted with md5.

Files :

Field	Type	Null	Key	Default	Extra	Description
FileId	int(11)	No	PRI	NULL	auto_increment	The FileId number of the file in the database.
FileFormatId	int(11)	No	FOR	NULL		FileFormatId describes the format of file. (0-images / 1-videos / 2-pdfs / 3-docs / 4 - text / 5 - ppt)
DocumentTypeId	int(11)	No	FOR	NULL		DocumentTypeId describes the type of the document. (0 - media / 1 - research/ 2 - project)
PublicationName	varchar(200)	No		NULL		Publication name is the name with which the document has been published
PublicationYear	varchar(5)	No		NULL		It is the year in which the document was published
Language	varchar(15)	No		NULL		The language in which the file was published
Description	varchar(500)	No		NULL		A brief description of the document which enables us to locate the file easily.
FileName	varchar(200)	No		NULL		The name of the file being uploaded.
FilePath	varchar(200)	No		NULL		The location of the file in the system.
UploadDate	date	No		NULL		The uploading date of the file.
UserId	varchar(50)	No	FOR	NULL		UserId - It is the Id of the user which enables us to know which user uploaded

						which file.
--	--	--	--	--	--	-------------

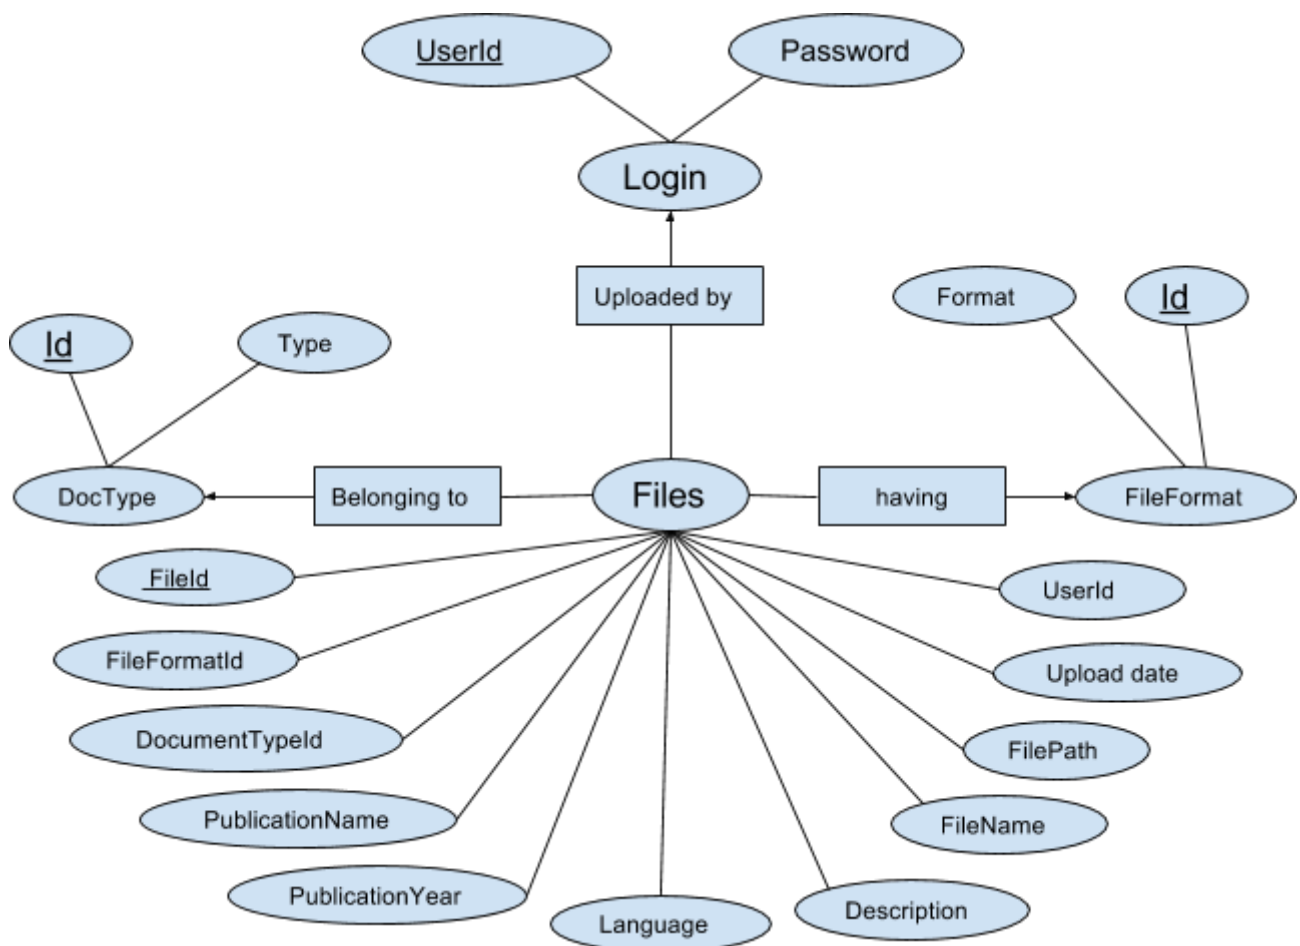

FileFormat:

Field	Type	Null	Key	Default	Extra	Description
Format	varchar(15)	NO		NULL		It tells the format of a file. (images, videos, pdf, doc, text, ppt)
Id	int(11)	NO	PRI	NULL		Each format is given an Id.(0 - images/ 1 - videos / 2 - pdf / 3 - doc/ 4 - text, 5-ppt)

DocType:

Field	Type	Null	Key	Default	Extra	Description
Type	varchar(15)	NO		NULL		It tells the type of a file. (0-Media, 1-Research, 2-Projects)
Id	int(11)	NO	PRI	NULL		Each type is given an Id.(0 - Media/ 1 - research / 2 - Projects)

ER model

Software Requirements

PHP - It is used in the backend to connect to the database and save(retrieve) data to(from) the database.

Mysql Database – To save data related to the files being uploaded.

Apache 2.0 web server

System details - OS 64 bit , 4GB RAM
